

BOTANY CRANES & FORKLIFT SERVICES

Doc No POL 3.1
Created 15/02/16

ENVIRONMENTAL & SUSTAINABILITY POLICY

The Director recognises that the business Botany Cranes undertakes is amongst those industries having a very low impact on the environment. To ensure that these low impacts are maintained, we have implemented an Environmentally Sustainable Management System for our company. This reflects the high priority we give to ensuring that we are an environmentally responsible corporate citizen.

The system applies to all our operational activities including installation and construction activities as required by our clients. Whilst the final product of our work is dictated by the requirements of our clients we will continually press to be environmentally conscious during our operations. We will seek to use environmentally friendly component products and recycled materials as alternatives wherever possible.

In the depot / workshop our primary environmental goal is in the prevention of pollution, as this is the aspect over which we exercise most control, particularly in relation to water, air and noise. We have a monitoring strategy for our stormwater runoff and have recently installed solar power to power the depot and offices. All paper waste generated by the office is recycled.

In documenting our environmental policy we commit our organisation to follow goals:

- * Establishment of a culture of continual improvement and prevention of pollution.
- * Compliance with environmental legislation and client requirements
- * The education and training of our employees, subcontractors and anyone working on our behalf in the requirements of environmental expectations.
- * Provision of emergency response mechanisms such as spill kits that are carried on each crane.
- * To promote the use of suppliers and sub-contractors who are environmentally responsible.
- * To promote the conservation of natural resources.

BOTANY CRANES & FORKLIFT SERVICES

We are conscious that Environmental Management is best handled with the co-operation of all citizens and as such we will display this statement as a public document.
